Reparasi Jiwa Indonesia - Mojokerto, East Java, Indonesia

Jul 2026 - Sekarang

Full Stack Developer Intern

- Developing an internal web-based system for Reparasi Jiwa Indonesia to support the organization's operational and administrative needs.
- Working across full stack development, contributing to both front-end and back-end implementation.

PT Kreasi Bali Sasmita - South Jakarta, DKI Jakarta, Indonesia

Jan 2026 - Jun 2026

Full Stack Developer Intern

- Built full stack features (backend, AI integration, and UI) for EduMind AI, a school digital wellbeing system for emotional literacy and preventive guidance, developed under strict ethical and child-protection governance.
- Contributed to backend and AI feature development for Parahita LMS, including its AI Learning Coach an AI-powered platform for structured therapist competency development.
- Developed backend APIs and database operations (FastAPI, PostgreSQL, Alembic) with reusable, modular components, and collaborated with cross-functional engineers to ensure scalability across both platforms.

Dicoding Indonesia - Madiun, East Java, Indonesia

Nov 2025 - Jun 2026

Community Builder & Leader

- Founded and grew Dicoding Community from 0 to 60+ active members in 2 months by partnering with Dicoding Indonesia to promote scholarships and learning resources.
- Organized 5+ technical sessions on Git workflows and personal branding while leading onboarding programs for student tech journeys.
- Established a structured peer learning environment for IT students to master technical skills through hands-on collaboration.
- Facilitated technical workshops for 60+ members to enhance their understanding of modern web ecosystems.

Himpunan Mahasiswa Teknologi Rekayasa Perangkat Lunak - Madiun, East Java, Indonesia

Jan 2025 - Dec 2025

Coordinator of Domestic Affairs Division

- Supervised 10+ members and managed 3 internal organizational programs to support student engagement and division productivity.
- Led major events as Executive Chair of Joint Meeting and Deputy Chair of Study Program Introduction Event, coordinating logistics and ensuring successful execution for 100+ participants.
- Coordinated cross-divisional communication between board members and general members to ensure smooth operations and alignment across teams.

Politeknik Negeri Madiun - Madiun, East Java, Indonesia

Jul 2024 - Oct 2024

Community Service Project Team Member – PKM Pengabdian Dosen

- Developed and tested Computer-Based Test (CBT) application features for National Science Olympiad (OSN) simulation, successfully deployed for pilot testing.
- Provided technical training and digital platform support to 5+ teachers on CBT usage.
- Collaborated with cross-functional team to ensure application functionality aligned with OSN simulation requirements.

BPSDMP KOMINFO Surabaya - Madiun, East Java, Indonesia

Jul 2024

Junior Web Developer Trainee

- Developed responsive full-stack applications using React and Node.js during an intensive bootcamp.
- Built and debugged hands-on projects, focusing on high-quality code and seamless UI/UX.
- Mastered core web technologies including HTML, CSS, JavaScript, and database management.

Pendidikan

Politeknik Negeri Madiun - Madiun, East Java, Indonesia

Aug 2023 - Oct 2027 (Perkiraan)

Diploma in Software Engineering Technology, 3.78/4.00

Projects

EDUMIND AI - School Digital Well-being Platform

Next.js, TypeScript, Tailwind CSS, FastAPI, PostgreSQL

- Built a full stack school digital well-being platform with AI-powered emotional guidance for students and educators.
- Developed frontend, backend APIs, PostgreSQL operations, and AI integration using FastAPI for intelligent recommendations.
- Designed reusable system components and collaborated with cross-functional teams to deliver a scalable and responsive platform.

HAWRELOAD - Financial Information & Point of Sale System

Next.js, Express.js, TypeScript, Prisma, MySQL

<https://hawreload.online>

- Real-time web-based financial system for managing internet voucher, mobile credit, PPOB, and cash/transfer transactions.
- Built Admin (user, product, account, supplier, stock, and financial report management) and User/Shift Attendant (transactions, account balance, and shift recap) interfaces.
- Implemented real-time transaction monitoring via Server-Sent Events (SSE), plus financial report export to Excel and PDF.

NGOPAI - Digital Education Platform

Next.js, TypeScript, Tailwind CSS, PostgreSQL

<https://ngopai-paislove.vercel.app>

- Real-world collaboration project built for and approved by the Ministry of Religious Affairs, East Java (Kemenag Jatim).
- Platform to manage Islamic education (PAIS) activities, materials, certificates, and participant attendance in one integrated system.
- Implemented admin dashboard with activity/schedule management, participant data tracking, and automated certificate generation.

Paratamu Coffee

React, TypeScript, Tailwind CSS, Express.js, Supabase

<https://paratamu-coffee.vercel.app>

- Developed a full-stack website for a local café featuring an interactive menu, facility showcase, and online reservation system.
- Built a fully responsive UI with a cozy aesthetic that aligns with the brand's identity, supporting room selection and booking flow.
- Implemented backend with Express.js to handle reservation management and menu data via RESTful API.

AI Career Roadmap

Next.js, TypeScript, Tailwind CSS, Gemini API

<https://career-roadmap-dev.vercel.app>

- Built an AI-powered career platform with interactive roadmaps and personalized recommendations for 50+ users.
- Integrated Gemini API with 95% response accuracy to provide real-time career counseling through conversational interface
- Designed and implemented fully responsive UI supporting 10+ career paths with dynamic roadmap generation based on user input

GulaGuard - AI Nutrition Assistant

React, TypeScript, Vite, Tailwind CSS, Gemini API

<https://gulaguard.vercel.app>

- AI-powered nutrition assistant (installable PWA) that helps users track daily sugar intake to reduce diabetes risk.
- Integrated Google Gemini API for AI-driven food/nutrition analysis, with client-side image compression for photo-based input.
- Built as a Progressive Web App using React 19, Vite, and Tailwind CSS 4 for a fast, installable mobile experience.

Portfolio Website

Next.js, TypeScript, Tailwind CSS, Gemini API

<https://portfolio-riancahyo.vercel.app>

- Developed a high-performance portfolio using Next.js and TypeScript, optimized for SEO and fast loading.
- Built "Smart Talk," an AI chatbot that provides real-time information about my experiences and certifications via natural dialogue.
- Designed an interactive UI with Tailwind CSS, featuring smooth animations and a fully responsive layout.

E-Book Library

Laravel, Livewire, MySQL

<http://ebook-library.great-site.net>

- Developed a full-stack E-Book platform using Laravel and MySQL with a real-time digital catalog.
- Integrated Livewire and React to build reactive UI with instant search and dynamic filtering.
- Implemented secure authentication and database schemas to manage book tracking and user collections.

AI Financial Assistant

React, TypeScript, Vite, Tailwind CSS, Gemini API

<https://keuangan-balqis.vercel.app>

- Built AI-powered personal finance application with expense tracking across 10+ categories and intelligent budget recommendations reducing overspending alerts by 40%
- Integrated Gemini API to deliver personalized financial insights with 24/7 chat support for money management queries
- Developed interactive dashboard with 5+ Chart.js visualizations for real-time spending analytics and monthly trend analysis
